Mission Statement

Osteopathy is Service

We use our hands.....

to treat the Whole patient
to listen to the indwelling movements of Life
to treat all levels of illness
to assist in building the patient's functional reserve
to support balance in the body by balancing the activity of the nervous system
to explore "laws not framed by human hands" (Dr. Sutherland)
to cooperate and communicate with the Laws of Nature (Dr. Wales)
to find the Health (Dr. Still)
to find the treatment plan
to find the diagnosis
to help establish a point of Rest or Neutral around which the Whole can come to balance

We believe.....

that we have the innate capacity to heal
that the body functions as a whole
that the autonomic nervous system plays a major role in disease and healing
that structure and function are one form of activity
that the Divine is indwelling
that there is a Constant movement towards Normal
that we are here to Serve Humanity

Normal is.....

"a sense of peace and harmony" (Dr. Sutherland)
an ease of motion, without tension
being Neutral
Wholeness
the capacity for change

"Skill is..... proportionate to one's understanding normal (Dr. Still)
